Two outstanding conversion options

The need
Term insurance can be the first step in helping your clients protect their financial futures. Offering protection they can afford today locks in their insurability, allowing them to potentially convert to a permanent policy in the future. This is beneficial because once they purchase a Term policy, their health may change (e.g., hypertension, heart disease, cancer, diabetes). Even 10 or 20 years later, they can still qualify for a Standard or better rate without additional underwriting requirements. If the insured is rated (up to table 6 on Term), the rating will carry over to the permanent policy.

How it works
Standard Policy Conversion Privilege — Allows the insured to convert to a permanent policy based on the earlier of the conversion period (10YT: first seven policy years; 15YT: first 12 policy years; 20YT: first 15 policy years; 30YT: first 20 policy years) or the policy anniversary nearest insured’s attained age 70.4
Conversion Extension Rider — Allows the conversion option to extend to the earlier end of the full level premium period and the policy anniversary nearest insured’s attained age 70. Issue ages for the rider are: 10YT: 20-62; 15YT: 20-57; 20YT: 20-54; 30YT: 20-49. The rider is only available at issue, and there is a charge to purchase it.

Minimum policy amounts at the time of conversion apply.
• The underwriting class of the permanent policy will be issued at the same or most comparable risk class of the original Term policy.
• The policy will be issued based on age nearest birthday guidelines. Backdating is not available.
• Partial Term conversions are allowed, provided the remaining Term policy and the new policy both meet their respective minimum face amount guidelines.
• Two Term policies can be converted to one Survivorship Universal Life (SUL) policy.5
• The Chronic Illness Death Benefit Advance Rider6 is available on several of our permanent policies and may be added at time of conversion. Additional underwriting is required.

**Base policy conversion**
