

Principal® Term life insurance

Options to meet many needs

Product & sales guide

Ideal prospects

Term insurance is ideal for those who need:

- Life insurance coverage for a limited amount of time (proof of credit, business start-up, buy-sell agreement funding, key person).
- The most cost-efficient rates for the coverage needed.
- To preserve their insurability now, with conversion options¹ to permanent policies in the future (no new underwriting as long as the face amount remains the same).

Top strategies

- Key person insurance
- Buy-sell funding
- Key employee benefits
- Personal planning needs for business owners, key employees, and their family members

Competitive sweet spots

Our Term policy is known to be most competitive for:

- Ages 35–55, non-tobacco rates
- Standard and better rates
- \$2 million or greater death benefit
- Ages 65–75 for 10- and 15-year Term above \$1 million

¹ Principal Term has convertible and nonconvertible term options.

What makes Principal Term attractive for business and personal planning?

- Choice of convertible and nonconvertible policy options.
- Competitive rates at many ages and risk classes.
- Two optional face amount increase riders designed specifically for business use.
- Fast and easy underwriting and new business programs, including Principal Accelerated UnderwritingSM, Principal Life Online, Healthy Lifestyle Credits, Business Solutions Enhanced Underwriting, and more.

Choose a conversion option that works for your client

Term insurance can be the first step in helping clients protect their financial futures. Offering temporary coverage today locks in their insurability, allowing them to potentially convert to a permanent policy in the future. But future conversion isn't always important or applicable, for example an employer-owned key person policy wouldn't need conversion rights. That's why we offer your clients a choice of a convertible or nonconvertible policy.

Policy options

No conversion. The nonconvertible policy has no conversion rights and is the lowest premium option.

Limited conversion period. The convertible policy allows the policy owner to convert to a permanent policy for a portion of the initial level premium period:

- 10YT: first seven policy years*
- 15YT: first 12 policy years*
- 20YT: first 15 policy years*
- 30YT: first 20 policy years*

* Or until the policy anniversary nearest the insured's attained age 70, whichever is earlier.

Full level term conversion. The convertible policy with Conversion Extension Rider extends the option to convert to the earlier of completion of the initial level premium period or the insured's attained age 70. The rider is only available at issue and there is a charge to add it.

Additional details

- Minimum policy amounts at the time of conversion apply.
- The permanent policy will be issued at the same or most comparable underwriting risk class of the original Term policy.
- The policy will be issued based on age nearest birthday guidelines.
- Partial Term conversions are allowed, provided the remaining Term policy and the new policy both meet their respective minimum face amount guidelines.
- Two term policies can be converted to one Survivorship Universal Life policy. Conversion is allowed up to twice the face amount of the smaller of the two term policies.
- The Chronic Illness Death Benefit Advance Rider² is available on several of our permanent policies. It may be added at time of conversion with no additional underwriting. If the Term policy is beyond its first five years at conversion, additional underwriting is required.

² The Chronic Illness Death Benefit Advance Rider is an additional coverage option that allows you to access part of your policy's death benefit if you're diagnosed with a chronic illness. The policy has specific details for the rider. There is no premium charge for the rider. The maximum lifetime accelerated death benefit amount is the lesser of 75% of the Initial Eligible Amount or \$2 million. Not available in all states.

Key person sales idea

Objective: Help protect businesses in the event of the death of a key person or owner allowing the company to continue operating despite possible loss of revenue and increased expenses from recruiting and training new employees.

Challenge: Obtaining a policy that can provide affordable coverage and help provide financial support to the business in the event of loss of top talent

Why term insurance? Can effectively cover loss of revenue and increased expenses with cost-effective coverage and a generally income tax-free death benefit.¹

- Allows the business owner to tailor the length of coverage based on the employee's estimated employment time.
- Offers an affordable insurance solution for situations that may change in the future.
- Provides fast and convenient application and underwriting process for busy professionals.

Take action: Review the Term key person sales idea (BB12372). Then, get a customized quote by using our calculator: principal.com/keypersoncalc.

⁴ If the requirements of Internal Revenue Code Section 101(j) are not met, death proceeds from employer-owned life insurance contracts may be taxable as ordinary income in excess of cost basis.

As needs increase, coverage can, too.

The Business Value Increase Rider and Salary Increase Rider are optional features designed specifically for business use.

Business Value Increase Rider

This rider allows business owners to get increases in their coverage based on growth in the value of their business, without additional underwriting. The increases work in three-year cycles, like this:

- Your business is valued at the start of the three-year period.
- Your coverage is increased 5% after years one and two, for a total increase of 10% after two years.
- After the third year your business is valued again. Any increase in value above 10% results in a matching percentage increase in the policy's face amount.

Hypothetical example: If a business value increased 22% over the three-year period measured, the policy face amount would be increased an additional 12% at the end of the third year.

- (5% after year 1 + 5% after year 2 + 12% after year 3)

Salary Increase Rider

This rider helps an employee's coverage keep pace with rising income. It offers increases in the policy face amount based on salary adjustments, without additional underwriting.

Hypothetical example: A \$1 million term policy is issued for an individual whose annual salary is \$100,000. After the first policy year, the individual's employer lets Principal know their salary has increased to \$105,000. Their new policy face amount would be \$1,050,000.

- (Salary increase: $(\$105,000 - 100,000)/100,000 = 5\%$; Corresponding face amount increase: $\$1,000,000 \times 5\% = \$1,050,000$).

Informal business valuations

You can help your clients better understand the value of their business. As a complimentary service, Principal offers informal business valuations using five commonly used valuation methods. This valuation can be used to determine the value for purposes of the Business Value Increase Rider. Speak to your wholesaler about getting an informal business valuation.
