

Principal Dental Series II

Network Select

Network Select from Principal Life Insurance Company offers cost-savings by driving employees to our network providers who have agreed to charge lower fees. This design only provides benefits when employees visit network providers in the PPO network. And with one of the largest networks in the industry¹, the Principal Plan[®] Dental Network gives employees plenty of options to use their benefits.

Network Select is available in select states² and only with the Principal[®] Dental Series II (PDS II) product.

Sample of how it works

Employees must visit network providers since there are no benefits outside the network.

This is how the Network Select design compares to a traditional PPO design.

Other considerations

Orthodontia is available, but only if employees visit a network provider.

To offer employees more choice, this design could be used as the core benefit with the option for employees to buy additional coverage to suit their needs.

An easy benefit to take advantage of, Network Select offers cost-savings employees can see.
