

Help employees manage the financial impact of a serious illness.

Specified disease insurance helps your employees protect their financial security when diagnosed with a serious illness.

Life doesn't always go as expected. Serious illnesses happen. And while medical insurance helps pay for medical expenses, and disability insurance replaces a portion of lost income, they don't cover all the costs associated with having a serious illness.

That's why Principal® offers a way to help employees financially prepare for their expenses if the unexpected happens. With specified disease insurance, when a covered employee or family member is diagnosed with a specific disease, they receive a lump-sum cash benefit¹ to use any way they choose, regardless of other insurance they have or actual expenses incurred.

Product features

Covered specified disease	Benefit	
	First occurrence	Additional occurrences
